

ЦЦ

In recent years, automation became an increasingly important factor in public pharmacy.

Larger public space, optimization of the inventory and lower personnel costs are the

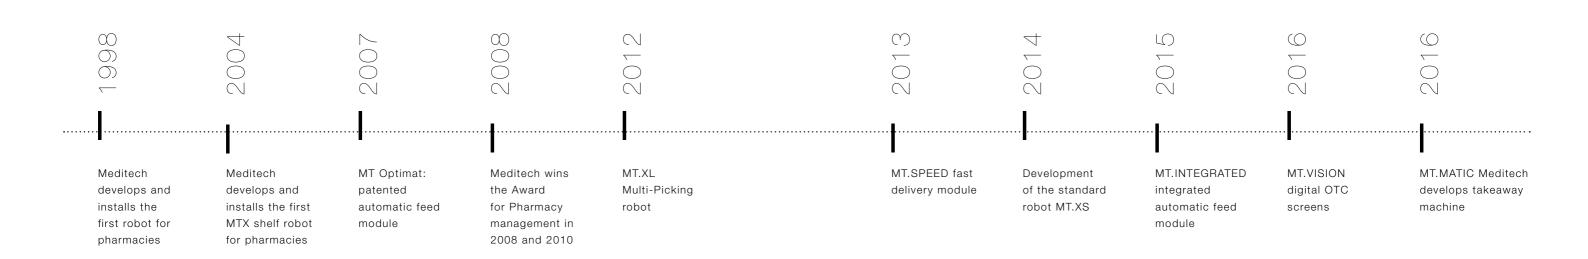

inventory and lower personnel costs are the basis for the implementation of pharmacy automation.

With over 75 years' experience in the pharmacy sector, Meditech is one of the market leaders in the development and manufacture of automation solutions for the public and hospital pharmacies. As the only Belgian manufacturer of pharmacy automation, we are able to distinguish ourselves through our customer-oriented and tailor-made approach.

A thorough knowledge of technological processes and our expertise in the pharmacy sector enable us to realize the most complex projects smoothly and according to your requirements.

The purchase of a pharmacy automation is a commitment for years. Our commitment to our customers is large and we guarantee excellent technical support and after-service for the entire period of use of the system. Our customers are the most valuable asset of our company and we strive for 100% customer satisfaction.

ЦЦ

A complete portfolio of services under the same flag, through a single point of contact.

••••••

So we can guarantee you a flawless communication and action very short time. You buy directly from the producer, or through our exclusive dealer network in your country.

Meditech is the only producer to offer an integrated and compact solution for the TOTAL pharmacy automation.

We do not only offer the robot, but also all the peripherals that guarantee optimum stock management in your pharmacy.

MT.XL

Fully automatic sorting storage of your medica

Functional management of expiry dates and non-sold medication.

Thanks to its intelligent storage control and the innovative Meditech gripper technology you always have direct access to one or more packages

MT. SPEED

Hybrid module is available for fast delivery of your top 100 products.

MT. VISION

••••••			
Fully automatic sorting, checking and			
storage of your medication.			

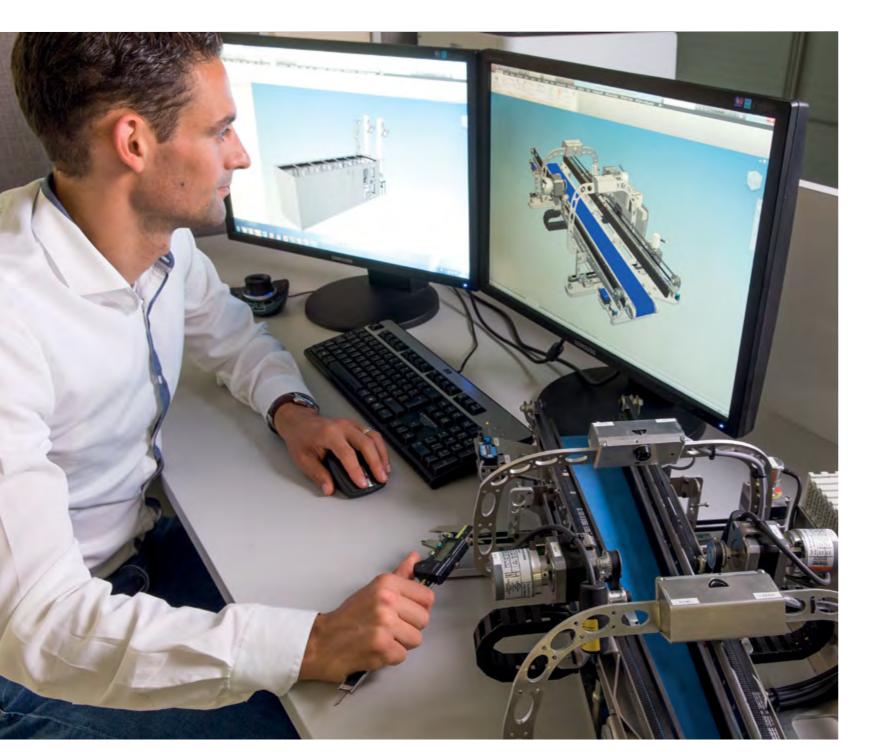

Digital touch screens enhance your advice and information to your patients.

MT.MATIC

..... The external 'click & buy'- module autonomous or linked to your robot in the pharmacy.

DEVELOPMENT

Innovative thinking and development of both products and processes are the cornerstone of our R&D-department. Using the most high-quality materials ensure a stable and sustainable operation. In-house R&D ensures that we efficiently meet the needs of the pharmacy market and anticipate quickly to changes or questions from our customers.

Meditech offers unique advantages:

.....

Щ

Lowest total cost of ownership. Lowest consumption of all available robots on the market - ECO efficiency.

Up to 70% less power consumption than the competition.

Lowest rates for maintenance and service contracts.

The only robot built with only industrial components.

10 years Cycle Lifetime warranty on all of its components.

Unique electronic input module (without mechanical moving parts).

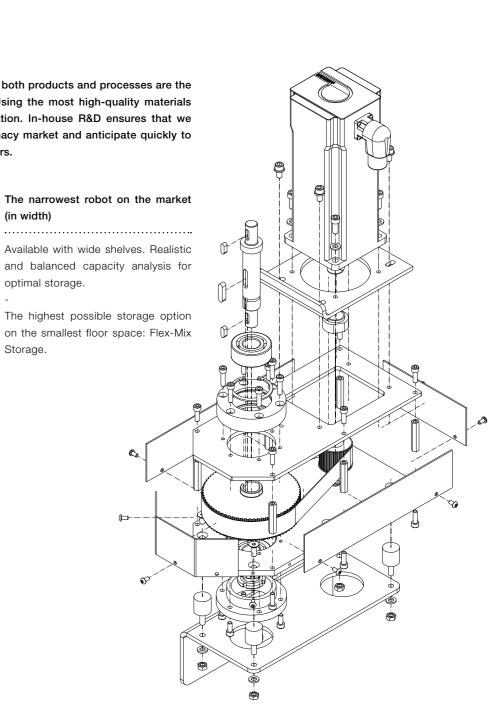

(in width)

Available with wide shelves. Realistic and balanced capacity analysis for

optimal storage. The highest possible storage option

Storage.

13

MEDI TECH NO LOGY

Unique non-rotating multi picking gripper

Multi-picking + Multi-Packaging: Several boxes (also of different sizes) on the gripper.

Non rotating gripper: No wear on rotating elements.

No time wasted in turning gripper and no inclined packages.

The 'softest' way to treat your efficiently.

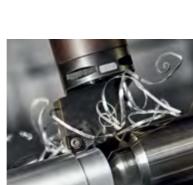

Continuous video recording on every movement of the robot.

Unique patented external / internal automatic feed unit: MT.OPTIMAT and MT.INTEGRATED

Maximum buffer for entering large amount and orders

-

Innovative development without camera or vacuum pump

ЦЦ

'Future proof' in use

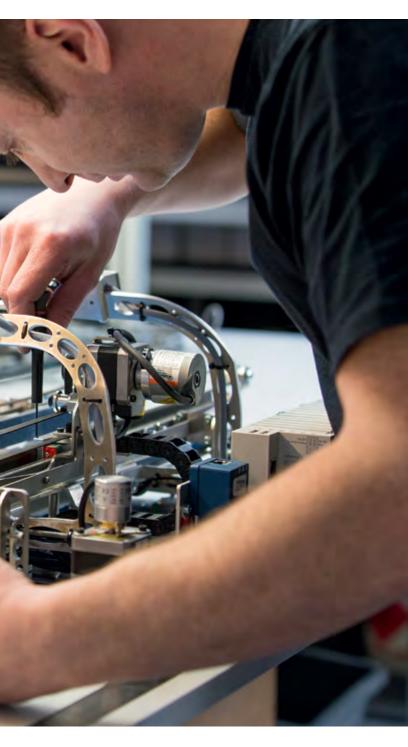

-

Processing of 2D matrix codes.

Use of the electronic prescription - ready.

Opened packages (semi-IMV). Without opening the blister (conditioning package is retained).

Multiple entry (of same medication type) = single scanning.

ICUSTAMIZATION

Meditech develops and manufactures all equipment in their own production area, tailor made for our customers.

A customized robot forms a synergy with the interior of your pharmacy and is tailored to the requirements and the use of the pharmacist and his team.

Meditech is the only robot developer where all modules and options can be chosen freely: Location of the door, manual and / or automatic feed module.

With the addition of glazed segments and the wide range of high quality finishing panels, we provide a tasteful architectural interpretation.

Flexibility and craftsmanship make Meditech a reliable partner.

lll

Global counseling and project management before and after sales.

hh

The optimal assistance and 'thinking' with the customer, always result in a perfect project for you.

Your complete installation process is followed by a single contact person.

He takes care of the coordination with the architect and interior designer.

Coordinates all contacts with the contractors involved.

Regulates the engagement with your pharmacy software.

Ensures the correct installation planning.

Via own installation technicians we guarantee a perfect installation and startup of your installation.

Every installation includes a thorough training for you and your staff.

Your automated robot is optimized to work continuously. To ensure this, our qualified engineers are permanently on hand.

..... You can count on us every day of the year, 24/7h for both telephone inquiries and/or intervention on site in your pharmacy.

To ensure proper functionality, we offer various maintenance contracts.

The Meditech-shelf robot is an example of top technology developed to the highest standards within the pharmacy automation. With the minimal width of the robot, we guarantee the highest possible capacity in minimum floor space. Our latest technology surpasses the needs of the pharmacy automation and offers a wide range of standard features.

MULTI PICKING ROBOT

ЦЦ

THE MT.XL OFFERS THE ONLY FLEXIBLE SOLUTION

As most flexible integrator, we offer you a robot, seamless according to your usage profile and matching your pharmacy design and personal wishes.

Easy to define charging and delivery points, tailored to your interior.

Door entrance either long or short side of the robot, ensure perfect implementation in your pharmacy.

Installation on ground floor, basement or upper floor(s) possible.

-

MULTI PICKING

Treating multiple (different) packages in one movement/ delivery batch.

TWO-WAY-FUNCTIONALITY

Treating multiple (up to 8) packages in one 'batch' movement. Boxes are manipulated, both left and right on the gripper. This allows us to avoid a rotating movement of the gripper, which results in a shorter handling time and optimal storage use.

••••••

FLEX STORAGE

The perfect method to optimally fill your robot.

NOISELESS MOVING

Maintenance-free and fully enclosed guides ensure quiet operation.

••••••

ELECTRONIC ENTRY MODULE

Our import module contains no mechanical moving parts, making it unique in its kind.

TOTAL AUTOMATION

Huge time savings by the use of the MT.OPTIMAT / MT.INTEGRATED option.

STOCK MANAGEMENT

The electronic identification of the medication, the First Expire First Out management ensure the greatest accuracy in your medicines stock.

.....

DIMENSIONS

..... Using the 2D Matrix Code Readers, the robot manages (without errors) the expiration dates of your medication.

CONTINUOUS IMAGE RECORDING

..... Every movement is closely monitored and recorded by two cameras on the gripper.

HIGHEST STANDARD OF SECURITY ••••••

Each Meditech robot is equipped with a UPS control unit of the highest class (VFI according to IEC 62040-3): This will ensure continuous operation during power failure but also protects for surge and spikes on the powernet.

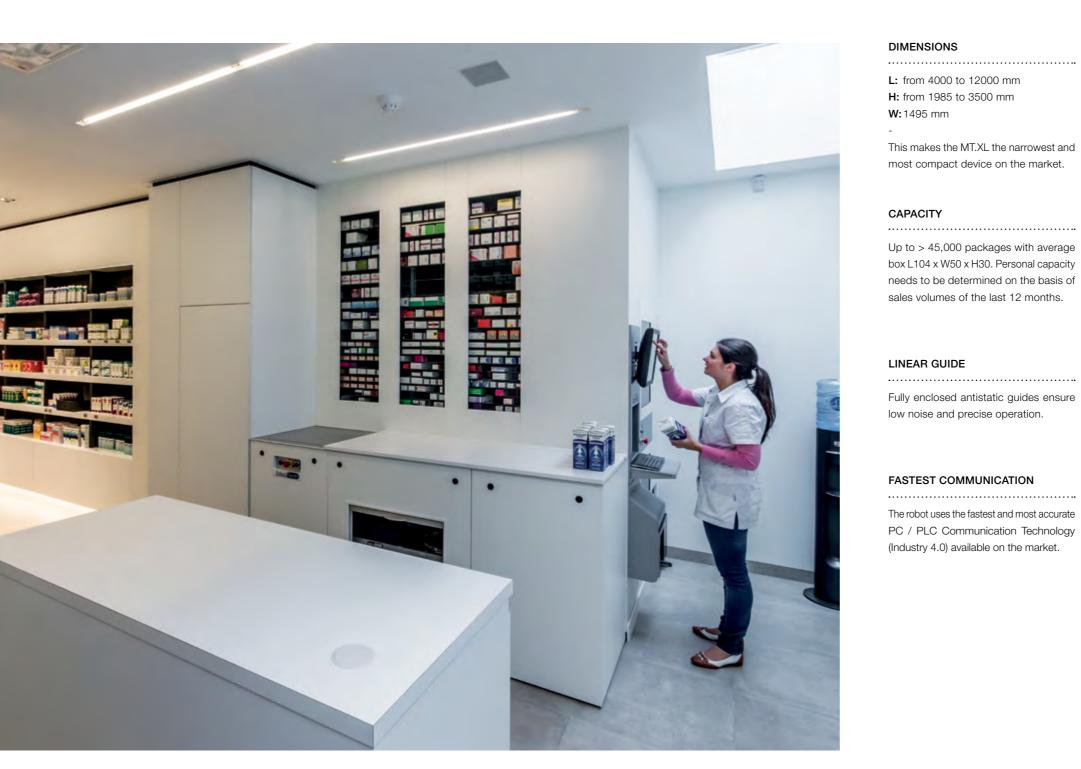

FASTEST COMMUNICATION

low noise and precise operation.

sales volumes of the last 12 months.

.....

..... The robot uses the fastest and most accurate PC / PLC Communication Technology (Industry 4.0) available on the market.

25

MT. OPTIMAT MT. INTEGRATED

FULLY AUTOMATED STORAGE OF YOUR MEDICATION IN YOUR ROBOT

The MT.OPTIMAT and MT.INTEGRATED stores all medication boxes in the robot, without any interference of the pharmacist.

Simply pour your products, delivered from the wholesaler or manufacturer in the MT.OPTIMAT. The products are then scanned automatically in order to be identified and stored in the robot.

Linked to your pharmacy software, your orders are accurately controlled, which guarantees a comprehensive stock management. Easily connectable to your MT.XL shelf robot and standard available in several colors to match your pharmacy interior design.

Both devices are constructed of low-maintenance industrial components and according to the latest technological developments.

Full DATA MATRIX - 2D code compliant, reads all barcode types available on the medication market.

ЦЦ

MT. OPTIMAT

MT, INTEGRATED

Its innovative exterior without pivoting doors provides a reduced space requirement in your pharmacy.

.....

Easily connectable to your MT.XL shelf robot and standard available in several colors to match your pharmacy interior design.

Can be placed against each MT.XL (also in a later stage).

Autonomous operation, with priority on the delivery to the patient.

The MT.OPTIMAT unit is always accessible for manual selection of products.

N OF THE PACK-

MT, SPEED

The MT.SPEED is an optional module for the MT.XL. It works autonomously and offers the ability to a fast delivery of a selection of products (high runners) to your selling points.

IMMEDIATE MEDICATION DELIVERY

Because of the independent operation of the MT.SPEED-module, packages are delivered simultaneously from both MT.XL as the MT.Speed. Through the statistical rule 5/50: 5% of the stock generates 50% of sales, we offer the ideal combination: the MT.Speed for "fast runners" and the MT. XL for the rest of your stock.

STOCK MANAGEMENT

The MT.Speed channels are automatically filled through the MT.XL gripper. MT.SPEED is the only 'fast delivery'-module on the market which has an individual delivery detection for each product channel, which guarantees a 100% correct stock.

.....

INTEGRATION

recognized.

MT.Speed is smoothly integrated into the MT.XL-robot, taking into account personal needs and your pharmacy architecture.

••••••

ARTIFICIAL INTELLIGENCE
