

KIOSK

Self-service kiosk for pharmacies

ADVANTAGES FOR YOUR PHARMACY

The Kiosk module is a new addition to Meditech's digital product range.

When installed in the pharmacy, this self-service terminal allows patients to:

- See product information.
- Perform self-checkout.
- Collect reservations.

These functions enable patients to manage their needs independently and without waiting.

The Kiosk can integrate with your pharmacy robot to access your full product inventory. Alternatively, it can operate as a stand-alone unit for your OTC and health & beauty assortment.

The Meditech Kiosk transforms your patient experience while maintaining the quality of your patient care, adding value to every type of pharmacy.

CLICK & COLLECT

Let your patients collect their reserved or ordered products quickly and independently via the Kiosk. This reduces queues at the counter and increases patient satisfaction.

OTC / HEALTH & BEAUTY

Enable self-checkout in your pharmacy with the Kiosk. Patients can browse and buy OTC and health & beauty products independently, reducing queues and boosting impulse sales.

LINKED TO YOUR ROBOT

Connect the Kiosk to your Meditech robot and give patients access to your automated stock by delivering products directly from your robot.

ONE KIOSK - DIFFERENT FEATURES

Your pharmacy, your needs, your Kiosk. You can enable or disable different functions to adapt the Kiosk to your specific requirements. There's no need to buy multiple kiosk devices - one system does it all.

QUICKPAY

Patients can shop for their products in your pharmacy and complete self-checkout (scan & pay) without queuing.

EXPRESSCOLLECT

Patients can pick up their reservations ordered via your webshop or in-store. By scanning their reservation pickup code at the Kiosk, your pharmacy robot automatically delivers their order.

BROWSE & BUY

Patients can browse your pharmacy robot's inventory and purchase products instantly, without visiting the counter. Products are automatically delivered by your pharmacy robot.

TECHNICAL INFORMATION

SLEEK DESIGN & VANDALISM PROOF

The Kiosk integrates seamlessly into any pharmacy with its black textured coating and concealed wiring. The device is vandal-proof through a special key and lock system.

PHARMACIST CONTROL

The Kiosk allows the pharmacist to designate which products require a safety check and pharmacist intervention. Pharmacist checks can be planned to occur at regular intervals, such as for every 10th patient.

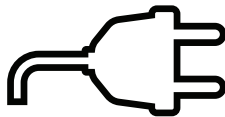

PATIENT ALERTS

The Kiosk monitors user activity with automatic session timeouts and has an assistance feature that alerts staff through LED colour changes when patients need help.

EASY PAYMENT & RECEIPT

Thanks to its integrated payment module and ticket printer, patients can easily pay by card or by contactless payment. A receipt can be printed or emailed after purchase.

STAND-ALONE

The Kiosk only needs a power and ethernet connection to work. Thanks to its compact dimensions, it can be placed on any table or surface.

LOCHTING PLATFORM

The Kiosk uses Lochting software, giving you full access to an extensive product database. It allows you to highlight products or use your pharmacy branding.

TECHNICAL DESCRIPTION

You can enable or disable different functions to adapt the Kiosk to your specific requirements.
